

Clearly Inspired.

PMV 2001 Purple

PMV 2000 Clear
with PMV Secure-It™

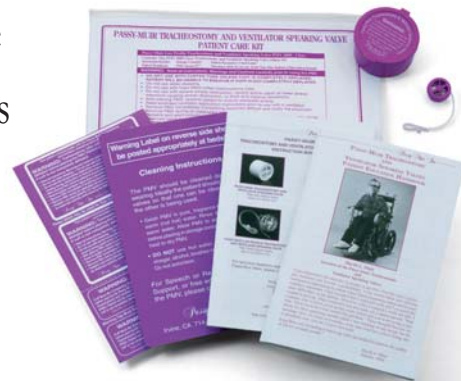

The original Passy-Muir Tracheostomy and Ventilator Speaking Valves were developed by a patient, David A. Muir.

David A. Muir, Inventor.

Following in David's innovative spirit, our patients and clinicians have inspired our new Low Profile PMV 2000 series valves and Patient Care Kit. For more

information, a free clinical video and research literature, call us at 1-800-634-5397.

The Patient Care Kit comes with a vinyl zipper pouch, clinical instruction booklet, patient handbook, chart and bedside labels, storage cup and PMV Secure-It™ which attaches to the trach tie to prevent valve loss.
