

Strategies for Assessment & Treatment Following Tracheostomy: An Interactive Seminar

Presented by Passy Muir

Saturday, September 21st, 2019 8:00 a.m. – 4:30 p.m.
Texas Health Harris Hospital Resources University
Rutledge Auditorium, 701 5th Ave., Fort Worth, TX 76104

This interactive seminar provides clinical information regarding the basics of a tracheostomy, including the physiologic impact of tracheostomy on a patient's respiratory, speech, and swallowing functions. Clinicians will learn step-by-step strategies to assess for the use of a no-leak speaking valve to restore communication, improve swallow, improve secretion management, and restore subglottic pressure in adults who require tracheostomy. Instructions for successful assessment and placement of a no-leak speaking valve in-line during mechanical ventilation will be demonstrated together with a review of ventilator settings, best practice procedures, and safe alarm practice when using a speaking valve. Advanced options for treatment of dysphagia, including while a patient is on mechanical ventilation will be presented. Attendees will learn the importance of early intervention and strategies for utilizing a no-leak speaking valve through case studies. Learning is enhanced through hands-on training sessions, patient videos, and group discussion.

AGENDA

- 7:30 – 8:00 Registration
- 8:00 – 8:45 Tracheostomy: Procedures, Timing & Tubes
- 8:45 – 9:30 Hands-On Learning
- 9:30 – 10:00 Importance of Effective Communication
- 10:00 – 10:15 Break
- 10:15 – 11:45 Application of a No-Leak Speaking Valve
- 11:45 – 12:45 Lunch and Learn:
FAQs, Barriers & Trouble-shooting
Lunch provided
- 12:45 – 1:45 Ventilator Application of a No-Leak Speaking Valve
- 1:45 – 2:45 Advanced Dysphagia: Considering Impact of Tracheostomy and Mechanical Ventilation
- 2:45 – 3:00 Break
- 3:00 – 3:45 Hands-On Learning: No-Leak Speaking Valve
- 3:45 – 4:30 Early Intervention, Rehab, and Case Studies
- 4:30 Adjourn & CEU Information

Gail M. Sudderth, RRT

Gail M. Sudderth, RRT has extensive experience in a variety of clinical settings as a respiratory therapist. As a lead therapist at a large teaching hospital, she worked with medically complex patients who required tracheostomy and mechanical ventilation, where her expertise was to manage patients who were considered difficult to wean. In her role, she worked closely with the speech-language pathologists and developed training competencies for suctioning and cuff management. Ms. Sudderth has developed and co-developed web-based presentations and on-site seminars for medical professionals who care for patients with tracheostomy. A recognized and invited speaker, she has presented in the US and internationally at hospitals and state and medical professional meetings on the topic of airway and ventilator management and the application of the Passy Muir® Valve. In addition, she has presented and published articles on the importance and development of multidisciplinary airway management teams. She is currently a full-time clinical specialist for Passy-Muir, Inc.

Speaker Disclosure Information:

*Financial – Gail M. Sudderth is a full-time clinical specialist for Passy Muir.
Non-financial - no relevant non-financial relationship exists.*

Any references to speaking valves in this presentation will focus exclusively on the bias-closed position Passy Muir® Valve and will include little or no information on similar products.

FEATURED SPEAKERS

Kristin King, PhD, CCC-SLP

Kristin King, PhD, CCC-SLP has been a speech-language pathologist in a variety of settings since 1995. She earned her PhD in Communication Sciences and Disorders from East Carolina University in 2008, specializing in cognitive-communication and swallowing disorders with medically complex patients of all ages with neuropathological disorders. She has trained SLPs in FEES and VFSS and developed programs for the management of patients on ventilators with use of Passy Muir® Valves and programs for assessment, treatment and management of patients with TBI. She has published peer-reviewed articles; is a recognized and invited speaker both domestically and internationally on the use of speaking valves, evaluation and treatment following TBI, and swallowing disorders; and served as an expert witness. She currently conducts research in these areas, while maintaining clinical skills through consultative services. She also participates in the development of multimedia education on topics relevant to speech language pathology, respiratory therapy, and nursing, among other clinical professions. She is the Vice President of Clinical Education and Research for Passy-Muir, Inc.
