

Strategies for Assessment & Treatment Following Tracheostomy: An Interactive Seminar

Presented by Passy Muir

Saturday, February 22nd, 2020 8:00 a.m. – 4:30 p.m.
Lutheran Hospital, Kachmann Auditorium
7950 W. Jefferson Blvd., Fort Wayne, IN 46804

This interactive seminar follows an adult patient from admission to rehabilitation and decannulation, providing you with the steps and strategies for assessing use of a no-leak speaking Valve when the patient in the intensive care unit and on mechanical ventilation to transitioning them to Valve use during spontaneous breathing and then to decannulation. The impacts on communication, swallowing, secretion management, and subglottic pressure will be discussed. Advanced options for treatment of dysphagia will be presented. Strategies to promote early intervention and teamwork will be given. Attendees will learn through didactic methods, hands-on training sessions, patient videos, and group discussion.

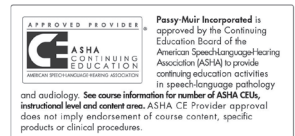

Attendees are highly encouraged to view *Tracheostomy: Procedures, Timing and Tubes*, and *Vent for the Non-RT* webinars prior to the seminar. These webinars can be found on the Passy Muir website at:
www.passymuir.com/ceu

AGENDA

7:30 – 8:00	Registration
8:00 – 8:15	Introduction
8:15 – 8:45	Early Intervention and Communication
8:45 – 9:00	Case Study – Patient Presentation
9:00 – 10:15	When and How to Begin Application of a Speaking Valve with Mechanical Ventilation
10:15 – 10:30	Break
10:30 – 11:00	Group Discussion
11:00 – 11:30	Hands-On Learning
11:30 – 11:45	Transitioning from Ventilator to Trach Collar
11:45 – 12:45	Lunch & Learn, Q&A – <i>Lunch provided</i>
12:45 – 1:45	Application of a No-Leak Speaking Valve
1:45 – 2:00	Break
2:00 – 3:00	When and How to Address Swallowing
3:00 – 3:30	Hands-On Learning
3:30 – 4:30	Developing and Working with a Team
4:30 – 4:45	CEU Information & Adjourn

Gail M. Sudderth, RRT

Gail M. Sudderth, RRT has extensive experience in a variety of clinical settings as a respiratory therapist. As a lead therapist at a large teaching hospital, she worked with medically complex patients who required tracheostomy and mechanical ventilation, where her expertise was to manage patients who were considered difficult to wean. In her role, she worked closely with the speech-language pathologists and developed training competencies for suctioning and cuff management. Ms. Sudderth has developed and co-developed web-based presentations and on-site seminars for medical professionals who care for patients with tracheostomy. A recognized and invited speaker, she has presented in the US and internationally at hospitals and state and medical professional meetings on the topic of airway and ventilator management and the application of the Passy Muir® Valve. In addition, she has presented and published articles on the importance and development of multidisciplinary airway management teams. She is currently a full-time clinical specialist for Passy-Muir, Inc.

Non-financial - no relevant non-financial relationship exists.

Any references to speaking valves in this presentation will focus exclusively on the bias-closed position Passy Muir® Valve and will include little or no information on similar products.

FEATURED SPEAKERS

Kristin King, PhD, CCC-SLP

Kristin King, PhD, CCC-SLP has been a speech-language pathologist in a variety of settings since 1995. She earned her PhD in Communication Sciences and Disorders from East Carolina University in 2008, specializing in cognitive-communication and swallowing disorders with medically complex patients of all ages with neuropathological disorders. She has trained SLPs in FEES and VFSS and developed programs for the management of patients on ventilators with use of Passy Muir® Valves and programs for assessment, treatment and management of patients with TBI. She has published peer-reviewed articles; is a recognized and invited speaker both domestically and internationally on the use of speaking valves, evaluation and treatment following TBI, and swallowing disorders; and served as an expert witness. She currently conducts research in these areas, while maintaining clinical skills through consultative services. She also participates in the development of multimedia education on topics relevant to speech language pathology, respiratory therapy, and nursing, among other clinical professions. She is the Vice President of Clinical Education and Research for Passy-Muir, Inc.
