

Tracheostomy & Mechanical Ventilation: Improving Voice, Swallow, & Upper Aerodigestive Functions

Presented by Passy Muir®
July 23rd, 9:30 a.m. – 6:30 p.m. EST.

7 LIVE
Continuing
Education
Credits

Learn about the use of the no-leak, bias-closed PassyMuir® Valve during the care of patients with tracheostomies through this interactive, virtual seminar. Providing a multidisciplinary approach, this seminar will address steps and strategies for assessing use of the Valve for patients on mechanical ventilation to weaning them to use once off the ventilator. Attendees will learn techniques for improving communication, swallowing and secretion management, and pressures, among other benefits. Potential impacts on mobility, infection control, and weaning also will be discussed.

This unique, virtual seminar allows you to tailor the learning to your experience level. Concurrent sessions for dysphagia, one fundamental and one advanced, and concurrent sessions for ventilator application, one fundamental and one advanced, will be offered. Covering the fundamentals to advanced techniques for successful assessment and placement of the Valve in-line with mechanical ventilation, the concurrent sessions will review ventilator settings, best practice for alarm management, and troubleshooting through case studies. Fundamentals and advanced considerations for dysphagia management also will be addressed, including the clinical bedside assessment to instrumental considerations for patients on mechanical ventilation. You select the session that fits your level best. For two weeks following the seminar, all concurrent sessions will be offered as recorded sessions, allowing you the benefit of viewing all sessions or to repeat the session you attended. Attendees will learn through didactic methods, breakout sessions with interactive training, patient videos and case studies, and panel discussions.

This seminar is designed for:

- Respiratory Therapists
- Speech-Language Pathologists
- Nurses
- Physicians
- Any other healthcare professionals who work with this patient population

*This course is offered for 0.7 ASHA CEUs
(Intermediate level, Professional area)*

Passy-Muir, Inc. is an approved provider of continuing education through AACN and the California Board of Nursing. This course is offered for 7 contact hours of continuing education.

AGENDA

9:30 – 9:45	Welcome and Review of the Agenda/Plan for the Day
9:45 – 10:45	Assessment, Placement, and Troubleshooting - Non-Vent
10:45 – 11:00	Networking & Transition to Sessions
11:00 – 11:30	Breakout Sessions - Cuff Management and Valve Selection
11:30 – 11:45	Networking & EXPO Q&A
11:45 – 12:45	Concurrent Session A1: Patient Assessment and Placement - Basic Ventilator Application Concurrent Session A2: Ventilator Management and Troubleshooting
12:45 – 1:00	Networking
1:00 – 1:30	Breakout Session - Ventilator Application and Q&A
1:30 – 1:45	Break
1:45 – 2:45	Ethics and Importance of Teamwork
2:45 – 3:00	Networking & Expo
3:00 – 4:00	Concurrent Session B1: Fundamentals of Dysphagia Intervention Concurrent Session B2: Advanced Dysphagia Management
4:00 – 4:15	Networking & Expo
4:15 – 4:45	Breakout Sessions: Advanced Dysphagia & Teamwork Q&A
4:45 – 5:00	Networking
5:00 – 6:00	Early Intervention, Case Studies, and Troubleshooting
6:00 – 6:30	Summary Discussion, Q&A, and Adjournment

*This seminar is
offered for
7 LIVE continuing
education credits
and up to 5
additional recorded
continuing education
credits.*

FEATURED SPEAKERS & PRESENTERS

Kristin King, PhD, CCC-SLP

Dr. Kristin King is Vice President of Clinical Education and Research at Passy Muir. She has over 25 years of experience in medical speech-language pathology in the clinical, academic, and industry settings. Her relevant clinical experience is with complex medical patient populations both in pediatrics and adults, addressing dysphagia, traumatic brain injury (TBI), and tracheostomy and ventilator-dependent patient populations. She has conducted research investigating the impact of neuropathological disorders on communication and cognition, with a special emphasis on sports concussions. She maintains her clinical skills through consultative services and research collaborations with healthcare professionals. As a recognized subject matter expert in TBI, she also has participated in the development of content for various resources, such as the ASHA Practice Portal, and has acted as an expert witness. She also has published in peer-reviewed and clinical journals and regularly presents domestically and internationally on topics related to patients following TBI or patients with tracheostomies and speaking valves. She develops and oversees educational programming in multi-media formats, including print, video, and audio.

Speaker Disclosure Information: Kristin King is the full-time Vice President of Clinical Education and Research for Passy Muir. She has no relevant non-financial relationship to disclose.

Carmin Bartow, MS, CCC-SLP, BCS-S

Carmin Bartow is a speech-language pathologist who has over 20 years of experience working with medically complex patients in a variety of settings. She is Board Certified in Swallowing and Swallowing Disorders and is a Certified Endoscopist in the state of Tennessee. She has specialized in dysphagia intervention, assessment and treatment of patients with tracheostomy and mechanical ventilation, and in communication and swallowing intervention for patients with head and neck cancer. Carmin was instrumental in the development and success of the Vanderbilt University Medical Center Tracheostomy Team and in the Medical Speech Pathology: Best Practices annual conference. Additionally, she taught the Dysphagia course as an adjunct instructor at Tennessee State University. She has authored and co-authored multiple peer-reviewed papers and presentations on dysphagia, head and neck cancer, tracheostomy and mechanical ventilation, and multidisciplinary tracheostomy teams. Carmin is currently a full-time clinical specialist for Passy Muir.

Speaker Disclosure Information: Carmin Bartow is a full-time clinical specialist for Passy Muir. She has no relevant non-financial relationship to disclose.

Kristin Lascano, RRT

Kristin Lascano is a Registered Respiratory Therapist and has varied experiences in respiratory care. Kristin's background in respiratory therapy started in a NICU and transport of the neonatal patient. Her career continued into the adult acute care setting. Throughout her career, Kristin has assisted with multiple areas of clinical education for multidisciplinary team members, including mock code training, art line insertions, and ABCDE protocols in the ICU. She has also served as a clinical adjunct instructor for the respiratory college in her area. Kristin continues to maintain her clinical skills through PRN work at Baylor Scott & White Health in Texas. She is currently a full-time Clinical Specialist with Passy Muir.

Speaker Disclosure Information: Kristin Lascano is a full-time clinical specialist for Passy Muir. She has no relevant non-financial relationship to disclose.

Corey Mohnike, BS, RRT

Corey Mohnike is a registered respiratory therapist at a Level 2 Trauma Center. This includes first-hand experience as a patient requiring a tracheostomy after a motor vehicle accident and using the Passy Muir Valve. He has helped write multiple procedures regarding Passy Muir® Valve assessment and application with patients on mechanical ventilation. Corey currently serves as the Clinical Educator for a multidisciplinary staff at Bryan Health in Lincoln, Nebraska. He is also involved with the Nebraska Society for Respiratory Care and has spoken at multiple state meetings and national conferences.

Speaker Disclosure Information: Corey Mohnike is being paid a speaker fee for this presentation. He has no non-financial disclosure to disclose.

Rachel O'Hare, RRT

Rachel O'Hare started her respiratory therapy career in the United States Army Reserves where she served 13 years and did one tour in support of Operation Enduring Freedom. After returning home, she began working as a traveler and has worked in hospitals across the United States, including Alaska and Hawaii. She has a very broad knowledge in respiratory care and has worked in all patient care areas, including Adult ICU, Pediatric ICU, and Neonatal ICU. She also has worked in a pulmonary function lab in addition to long-term care. In 2018, Rachel began to pursue her passion of teaching, advancing her career away from the bedside into becoming a clinical educator for critical care ventilation products. She spent the last few years working as a regional clinical educator, providing clinical education and support for all of Northern California before joining the Passy Muir clinical team in 2022.

Speaker Disclosure Information: Rachel O'Hare is a full-time clinical specialist for Passy Muir. She has no relevant non-financial relationship to disclose.

Tiffany Oakes, MS, CCC-SLP

Tiffany graduated with a Master's in Speech-Language Pathology from the University of Tennessee Health Science Center in 2012. She has been a medical SLP in various settings from acute care to home health, treating both the adult and medically complex pediatric populations. Tiffany has experience developing patient care pathways to guide assessment and treatment selection for patients in home health, at both the state and national level. She has participated in research related to patients with TBI and sports concussions, and she has experience with research analysis and writing white papers. She is a volunteer for Remote Area Medical (RAM), assisting with medical services. She also participates in the development of multimedia education related to healthcare and clinical practice.

Speaker Disclosure Information: Tiffany Oakes is a full-time clinical specialist for Passy Muir. She has no relevant non-financial relationship to disclose.

Content Disclosure Information: During this course, any reference to speaking valves in this presentation will focus exclusively on the no-leak, bias-closed position Passy Muir® Valve and will include little or no information on similar products.
