

Speaking Valve Use with Tracheostomy and Mechanical Ventilation: Now, We're Talking!

Up to
8.5
Hours
Continuing
Education
Credits

Presented by Passy Muir®

June 1st, 9:00 a.m. – 5:00 p.m. EDT

University of South Florida, Marshall Student Center, Plaza Room 2708, 4103 USF Cedar Circle, Tampa, Florida 33620

This interactive and hands-on seminar is designed to take the clinician from understanding the basics of a tracheostomy, including the physiologic impact on a patient's respiratory, speech, and swallowing functions, to learning assessment and treatment considerations for no-leak speaking Valve use. Clinicians will learn step-by-step methods for evaluating a patient for use of the Valve both with and without mechanical ventilation. Strategies for restoring communication, improving swallow function, improving secretion management, and restoring pressures in adults who require tracheostomy will be reviewed. Attendees will have opportunities for practical application in breakout sessions which include demonstrations, hands-on training, and round table discussions. Attendees will learn the importance of early intervention and strategies for utilizing a no-leak speaking valve through case studies, mock assessments, and patient videos.

Bonus education opportunity: Registered seminar attendees will be granted access to a pre-recorded webinar, *Fundamentals: Tracheostomy Tubes to Mechanical Ventilation*. Approximately two weeks prior to attending the seminar, a link for this special one-hour webinar will be provided via email. This webinar is only available to seminar attendees and provides an overview of the basics of a tracheostomy tube, cuff management with inflation and deflation, and basic vent terminology. It is highly recommended as a prerequisite to the in-person seminar. To receive continuing education for the webinar, attendees complete the course, quiz, and evaluation.

This seminar is designed for:

- Respiratory Therapists
- Speech-Language Pathologists
- Nurses
- Physicians
- Any other healthcare professionals who work with this patient population

\$149 Early Bird Registration by 5/11/24
\$199 Registration after 5/11/24

*This course is offered for 0.75 ASHA CEUs
(Intermediate level)*

Passy-Muir, Inc. is an approved provider of continuing education through AACR and the California Board of Nursing. This course is offered for 7.5 contact hours of continuing education.

AGENDA

8:45 – 9:00	Welcome and Introductions
9:00 – 10:00	Assessment and Placement with Demonstration - Non-Vent
10:00 – 11:30	Breakout Sessions - Trach Tubes, Cuff Management, and Mock Assessment
11:30 – 12:00	Troubleshooting and Treatment with Case Study
12:00 – 12:15	Break
12:15 – 1:00	Lunch & Learn: Dysphagia Discussion and Panel/Round Table
1:00 – 2:15	Basics of Ventilator Application of the No-leak Valve
2:15 – 3:45	Breakout Sessions - Ventilator Application, Parts and Pieces, and Mock Assessment
3:45 – 4:45	Trachlore, Barriers and More
4:45 – 5:00	Summary Discussion, Q&A, and Adjournment

This seminar is offered for
7.5 LIVE
+ 1 recorded
hours of continuing education credits

FEATURED SPEAKERS & PRESENTERS

Kristin King, PhD, CCC-SLP

With over 25 years of experience in medical settings, academia, and industry, Dr. King brings a unique perspective to the care of patients with medical diagnoses. Her experience included a clinical focus on critical care and trauma, with an emphasis on traumatic brain injury (TBI) and patients with a tracheostomy with or without mechanical ventilation dependence. As a professor, she conducted research and published in peer-reviewed journals on TBI and swallowing disorders. She continues her career by working in industry to improve patient outcomes through the development of multi-media education and participating in product development and regulatory requirements for medical devices. She is the host of the CAM Podcast for Passy Muir, editor of Aerodigestive Health by Passy Muir, and contributes regularly at the state, national, and international levels for both speaking and clinical papers. She also is co-editor of the book *Tracheostomy and Ventilator Dependence in Adults and Children: Learning Through Case Studies*.

Speaker Disclosure Information: Kristin King is the full-time Vice President of Clinical Education and Research for Passy Muir. She has no relevant non-financial relationship to disclose.

Robin Helms, BS, RRT

Robin Helms is a registered respiratory therapist who has over 5 years of clinical experience working with acute care patients at a Level 1 trauma center. She completed her Bachelor’s degree in Respiratory Care in 2018. Robin has experience working with patients in many different critical care areas, such as medical, cardiac, trauma, emergency, and more. Robin has recently joined our Passy Muir clinical team to explore a new role in education. She is currently a full-time clinical specialist for Passy Muir.

Speaker Disclosure Information: Robin Helms is a full-time clinical specialist for Passy Muir. She has no relevant non-financial relationship to disclose.

Content Disclosure Information: During this course, any reference to speaking valves in this presentation will focus exclusively on the no-leak, bias-closed position PassyMuir® Valve and will include little or no information on similar products.
