

Little Patients, Big Voices: Pediatric No-Leak Speaking Valve Assessment and Use

Presented by Passy Muir®

August 29th, 2026, 9:00 a.m. – 5:00 p.m. EST

Dolly Parton Children's Hospital, 2018 W. Clinch Ave., Meschendorf Conference Room, Koppel Plaza, 2nd Floor, Knoxville, TN 37916

Up to **9**
Hours
Continuing
Education
Credits

Imagine restoring a patient's voice and improving their quality of life — even while they are on a ventilator. In this interactive, hands-on seminar, you'll explore pediatric considerations as you progress from foundational knowledge of tracheostomy and airway management to advanced assessment, placement, and troubleshooting of no-leak speaking valves. Special emphasis will be placed on pediatric anatomy and physiology, developmental considerations, family-centered care, and age-appropriate communication strategies. Through lectures, demonstrations, case studies, and mock assessments—including pediatric scenarios—you'll learn to confidently assess, implement, and optimize valve use for pediatric patients, both with and without mechanical ventilation. By the end, you'll be equipped with the clinical skills and strategies to enhance communication, airway safety, and patient outcomes in pediatric practice. **8 hours continuing education credits.**

Bonus education opportunity: Registered seminar attendees will be granted access to a pre-recorded webinar, *Fundamentals: Tracheostomy Tubes to Mechanical Ventilation*. This webinar is only available to seminar attendees and provides an overview of the basics of a tracheostomy tube, cuff management with inflation and deflation, and basic vent terminology. It is highly recommended that attendees view the webinar prior to the in-person seminar. To receive continuing education for the webinar, attendees complete the course, quiz, and evaluation, in addition to the seminar evaluation. **1 additional hour continuing education credit for a total of 9 for a total of 9.**

This seminar is designed for:

- Respiratory Therapists
- Speech-Language Pathologists
- Nurses
- Physicians
- Any other healthcare professionals who work with this patient population

Early Bird Registration: \$149 by 8/15/26

Seminar Registration: \$199 after 8/15/26

**Early Bird Two Seminars Combination:
\$250 by 8/15/26**

PASSY MUIR SEMINARS ARE HOSTED BY OUR EXPERT CLINICIANS

Kristin King, PhD, CCC-SLP

With over 25 years of experience in medical settings, academia, and industry, Dr. King brings a unique perspective to the care of patients with medical diagnoses. Her experience included a clinical focus on critical care and trauma, with an emphasis on TBI and trach/vent patients. As a professor, she conducted research and published in peer-reviewed journals on TBI and swallowing disorders. She continues her career by working in industry to improve patient outcomes through the development of multi-media education and participating in product development and regulatory requirements for medical devices. She is the host of the CAM Podcast for Passy Muir, editor of *Aerodigestive Health* by Passy Muir, and contributes regularly at the state, national, and international levels for both speaking and clinical papers. She also is co-editor of the book *Tracheostomy and Ventilator Dependence in Adults and Children: Learning Through Case Studies*.

Speaker Disclosure Information: Kristin King is the full-time Vice President of Clinical Education and Research for Passy Muir. She has no relevant non-financial relationship to disclose.

Gabriella Ortiz, BSRT, RCP

Gabriela Ortiz earned her Respiratory Care Practitioner license in 2006. She has extensive experience managing patients at different stages of care, including acute, sub-acute, sleep therapy, and homecare. As the Respiratory Clinical Director and General Manager at a respiratory care provider, Gabriela managed all company operations, including patient assessment and case management for pediatric and adult patient populations. Through her clinical knowledge, Gabriela advanced into clinical training and sales for critical care ventilation products for the ICU and PICU within acute and subacute hospitals. Gabriela combines her clinical experiences to support others through education, and she is an invited speaker for educational institutions, state and national conferences, Better Breather's Club, and ALS support groups. She has authored and co-authored multiple clinical papers, including peer-reviewed, on respiratory topics such as the progression of ALS, effects of a tracheostomy in neonates, and respiratory care plans for patients in homecare. Gabriela is currently a full-time Clinical Specialist with Passy-Muir, Inc.

Speaker Disclosure Information: Gabriella Ortiz is a full-time clinical specialist for Passy Muir. She has no relevant non-financial relationship to disclose.

Content Disclosure Information: During this course, any reference to speaking valves in this presentation will focus exclusively on the no-leak, bias-closed position Passy Muir® Valve and will include little or no information on similar products.
